GENERAL KINEMATICS ON THE MOVE

Crystal Lake, Illinois – GK Europe GmbH announced today the relocation of their office to Mündelheimer Weg 37, 40472 Düsseldorf, Germany. The new location offers expanded sales and service offices as well as a warehouse for parts and shipping. GKE will be operating from the new location effective immediately.

GKE Managing Director, Davide Gado had this to say about the exciting move:

'In line with the expansion of our activities in Europe, we decided to move our office and warehouse from Wuppertal to Düsseldorf, a very central location to serve our customer base across Europe. The Düsseldorf Messe is home to some of the most important events and exhibitions related to the industries we serve and the extreme proximity of our office to the Düsseldorf International Airport will allow us to organise seminars and training sessions for our customers directly at our facility, which can be reached in just minutes from the terminal. We also feel that the timing is very appropriate, as GIFA will be hosted in Düsseldorf in June 2015 and we will have an easily accessible location for customers that would desire a quieter environment, outside of the exhibition centre, and discuss their projects with General Kinematics.'

For more information, contact GK Europe GmbH at the new office, +49-211-542-25010, or GK's Marketing Department, Amy Donahue at 815-444-3594 or email adonahue@generalkinematics.com.

###

General Kinematics is the premier manufacturer of **vibratory equipment** for the processing of bulk materials. For more than 50 years, GK has lead technological advancements in vibratory equipment for the foundry, mining, and bulk processing industries. GK's patented Two-Mass technology operates vibratory equipment with less horsepower and more accuracy. The company also has an unparalleled Parts & Service division that provides 24/7/365 customer service and support along with same day shipping on all off the shelf, in-stock items. With over 40,000 installations in 35 countries and our 100% Process Guarantee, General Kinematics means: *Leadership in Vibrating Process Equipment.*
