

DELIVERY CARRIAGES

Automate your charge area

GK's delivery carriages transport your vibrating charge feeders from the scrap yard to your furnace. Units can be designed to be rail mounted all the way to fully independent radio controlled models. Custom designed to fit your specific furnace model, GK can create a delivery carriage that best fits your foundry layout and process.

Features

- ✓ Carriages automate furnace charge feeders, allowing them to index from scrap loading area to furnace
- ✓ Contact detectors mounted around the carriage frame safely stop units if something is in the carriage path
- ✓ Integrated safety alarms and lights alert workers to carriage movement
- ✓ Easily integrated into control system for seamless process operations
